Bicycle / Pedestrian Vision Newsletter

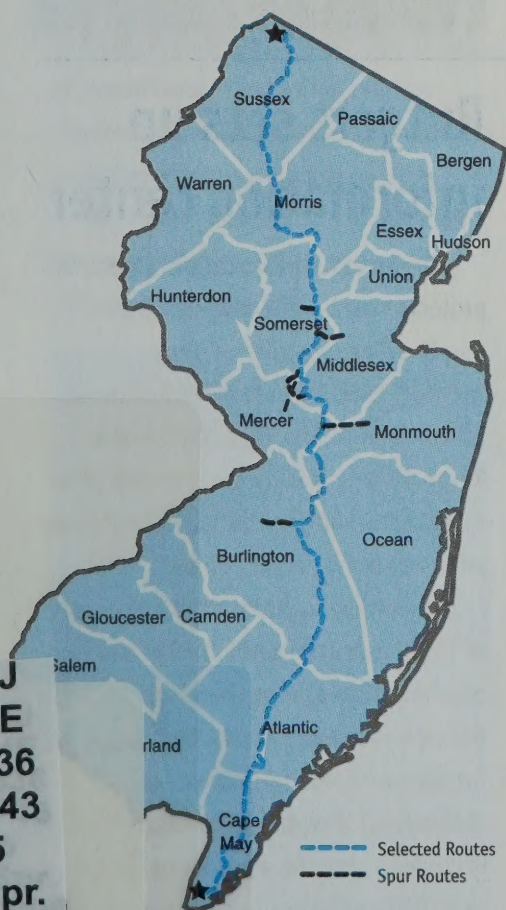

Acting Governor Donald T. DiFrancesco • Commissioner James Weinstein

High Point to Cape May: a 240 mile bicycle route

Sheree Davis of NJDOT's Office of Bicycle and Pedestrian Programs is traveling around the state to help communities along the 240-mile High Point to Cape May bicycle touring route. "I've met with all the municipalities involved, working on logistics and local approvals," Davis said, "and everyone was enthusiastic."

The High Point to Cape May bike route will begin in Sussex County and pass through 10 counties and 52 municipalities. It was introduced at public meetings after which NJDOT sought resolutions of approval.

NJDOT is designing a distinctive logo/trailblazer route sign and a sign and striping plan. A route map locating bicycle repair shops, eateries, restroom facilities and lodging is also planned.

HIGH POINT TO CAPE MAY BICYCLE TOURING ROUTE COUNTIES/MUNICIPALITIES

SUSSEX	SOMERSET	BURLINGTON	CAPE MAY
Montague Township	Bernardsville Borough	Bass River Township	Upper Township
Wantage Township	Bernards Township	New Hanover Township	Dennis Township

Allentown Borough	Plainsboro Township		
Upper Freehold Township	S. Brunswick Township		
	Cranbury Township		

Town centers bloom with 'Place' grants

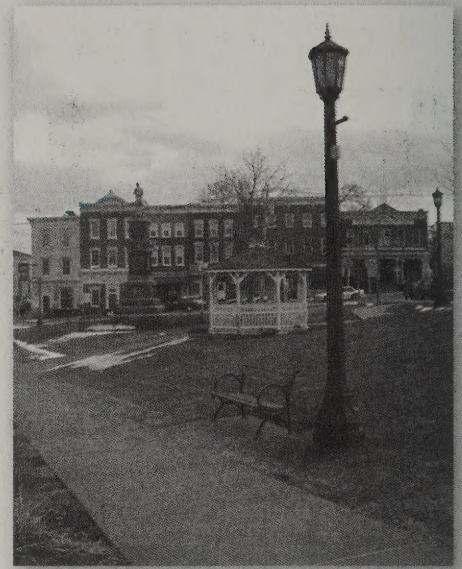

This year Local Government Services (LGS) received 48 applications worth \$12.7 million from 44 towns with designated centers as defined in the *State Development and Redevelopment Plan* through NJDOT's Centers of Place program.

Two of last year's successful projects were a pedestrian link from the

Transportation Center to the Washington Street Mall in Cape May City and the Market Yard pedestrian sidewalk in Freehold.

Newton in Sussex County has taken advantage of this funding as well. Over the past five years the town received three Centers of Place grants totaling \$616,000. The photographs illustrate how Newton used the funds to enhance its town center.

Right: Sussex County Park features an attractive gazebo, bench and historical lamppost. Below Left: Benches and planters are placed along improved sidewalks. Below Center: Moran Street benefited from a decorative sidewalk treatment. Below Right: Planting areas border decorative sidewalks on Spring Street.

NJDOT moves projects

Pedestrian safety

The Department will soon select five more locations to be improved for safety. The plans developed for the first five intersections identified in the pilot programs are now being implemented in Newark and Irvington.

Urbantran, Inc. is responsible for analyzing these locations and developing improvement concepts. The Office of Bicycle/Pedestrian Programs in coordination with the Bureau of Safety Programs is managing the project.

Local planning

NJDOT provides financial help to towns for their bicyclist and pedestrian program planning studies. The latest recipients of this assistance have begun their work. They are: Franklin, Manasquan, Medford, Mendham, New Brunswick, Oaklyn, Somerdale, South Brunswick (Kingston Initiative) and Summit.

Rutgers sets up information center

Those who plan bicycle and pedestrian projects now have a new resource.

The Transportation Policy Institute and the Center for Advanced Infrastructure and Transportation of Rutgers are under contract to NJDOT to establish an information clearinghouse and technical resource center.

A multimedia library and a directory of "Who's Who" in bicycle and pedestrian planning throughout the world will become a unique information resource for planners and decision-makers throughout the state. The Rutgers group will provide advisory assistance to NJDOT and other public agencies.

InMotion reports on NJDOT's ongoing bicycle and pedestrian programs and reports our progress in achieving initiatives. For more information or to submit ideas for this newsletter, please call Bill Feldman, NJDOT Office of Bike/Ped Programs, at 609-530-8062. Funding is provided by the Federal Highway Administration.

Pedestrian Task Force develops mission statement

The Pedestrian Task Force is a coalition of professionals from the public and private sector to improve New Jersey's pedestrian environment through education, activism and policy advocacy.

The Task Force is currently promoting "Creating More Walkable Communities," a speaker's program/media presentation targeted to local officials and citizens groups.

Those interested in scheduling the presentation or being trained as a presenter should call Diane Hitt of the NJDOT Office of Bicycle and Pedestrian Programs at 609-530-8051.

Members include representatives from transportation management associations, metropolitan planning organizations, the Division of Highway Traffic Safety, NJ TRANSIT, the Office of State Planning and the Departments of Health and Transportation. The Transportation Policy Institute at Rutgers provides administrative support.

For more information about Task Force activities call Sharon Roerty at 732-932-6812 Ext.699.

"The mission of the New Jersey Pedestrian Task Force is to support walking as a safe, convenient and sustainable form of transportation that increases our state's livability, enhances public life and improves public and environmental health. We seek to improve New Jersey's pedestrian environment through education, collaboration, policy, activism and advocacy."

NJDOT/NJDEP partnerships

Capitol to Coast Trail

The Department of Environmental Protection (DEP), under its Green Acres program, plans to acquire lands to create a continuous greenway with multi-use trails from the State Capitol to the Atlantic Coast across Central New Jersey.

NJDOT has facilitated trail development by awarding construction grants and planning assistance. Wall Township has received \$250,000 for construction. Manasquan is participating in the Local Bike/Ped Planning Assistance Program and the Local Aid District Office is assisting Howell in applying a \$600,000 Transportation Enhancements grant.

NJDOT crews are expected to complete the trail through Allaire State Park.

For further information log on to www.state.nj.us/dep/greenacres/

Seashore Lines Trail to link zoo and forest

Thanks to a \$500,000 Transportation Enhancements grant awarded to the Department of Environmental Protection, a 15-mile trail will be created along an abandoned railroad right of way in Cape May County.

In addition, Woodbine Borough has received several Transportation Trust Fund grants totaling \$343,000 for trail construction. NJDOT crews will complete the work.

The multi-use trail will link the Cape May County Park Zoo to the Belleplain State Forest and wind through Dennis Township, Middle Township and Woodbine.

NJDOT creates Office of Bike/Ped Programs

Sheree Davis (seated), Elise Bremer-Nei, Pauline Kanickij, Diane Hitt and Manager Bill Feldman make up the newly created Office of Bike/Ped Programs. The office will provide support and advice to units within the NJDOT to ensure that bicycle and pedestrian needs are appropriately addressed in its programs and projects.

NJDOT awards \$14 million more for bicyclists and pedestrians

Transportation Commissioner James Weinstein announced the award of \$14 million in FY '01 from the Transportation Trust Fund for 46 bicyclist and 53 pedestrian safety projects.

The grants total \$9 million for bicyclists for 45 municipalities in 18 counties. The \$5 million for pedestrian projects was divided among 53 municipalities in 20 counties. The projects are listed on the insert to this newsletter.

Leonia and Woodbine boroughs were two of the many municipalities to receive awards. Leonia, Bergen County, offered a plan for crosswalk treatments and Woodbine, Cape May County, submitted a plan for Phase 3 of a bike

path that is part of the 15-mile Seashore Lines Trail. Both projects were one part of a comprehensive planning effort within their municipality.

In response to last spring's mailing to all municipalities and counties in New Jersey, NJDOT's Division of Local Government Services and Economic Development (LGS) received 105 applications for bicycle projects worth \$29.6 million and 225 applications for pedestrian projects valued at \$32.7 million.

These grants represent taxpayer dollars directed back to communities for projects that improve the quality of life and make bicycling and walking safe travel choices for residents.

WATCH YOUR MAILBOX!

Bike/Ped

Local Government Services (LGS) will invite municipalities and counties to apply for another round of funding for bicyclist and pedestrian projects in the spring.

Enhancements

Announcements will be made in late spring for the \$11.06 million in federal funds for transportation enhancements under the Transportation Equity Act for the 21st Century. LGS has received 170 applications totaling over \$91,231,221. The Transportation Enhancements Advisory Committee will review the applications and make final selections.
